

We stand ahead in technology

1989 EST.

About Us

Established in the year 1989, engaged in manufacturing Paver blocks machines, and diversified in 2012, we, “**Apeshwar Engineering Works**”, are among the most distinguished organizations engaged in manufacturing and supplying range of Plastic Machinery with latest technology, good manufacturing practices and good after sales service. The range offered by us consists of PVC Pulverizer Machine or other PVC Plant Machineries. Our machines are manufactured in accordance with industry standards; we use superior quality material and advanced technology to maintain high standards of quality and flawless end products. Our machines are supervised at every manufacturing stages with our team of experts who rigorously examine our production line at different parameters and then dispatch and deliver to our esteemed customers. Accurate dimensions, corrosion resistance and excellent performance with low maintenance are what we assure to our costumers along with the machine.

With wide industry experience, in depth knowledge and constant innovation, “**Apeshwar Engineering Works**” has a huge customer base across the country

Mission

To be the leader in our field by making innovative and quality products with global technology and collaborating with customers to deliver economical and high performance product. Mutual interest towards financial stability and profitability of our company and our esteemed costumers.

Vision

Apeshwar Engineering Works is committed to consistent R&D and high tech engineering. Building a stable and respectable institution, we adhere to deliver the products as per customer's requirements. We offer unparalleled value to create customer satisfaction and enhance their business productivity. Our strength is our strong resources dedicated to our engineering and manufacturing divisions.

OUR TEAM

Blower

- High power blower with precision accuracy.
- High material conveying capacity.
- Heavy duty metal body.

Air Lock Valve

- Running valves at low tip speed to prevent possible ignition source.
- Outboard bearing and main shaft seal assembly eliminates bearing failure & frictional heat
- Rotor blade standard thickness is 10mm

Screener

- Accurate screening and material control.
- Higher screening capacity.
- Easy to change vibro screen for various powder quality.

Pulverizer System

- India's first twin excel drive technology in plastic pulverizer.
- High impact load generated between component called liner & bitter during operation is used to size reduction of granules easily.

Pulverizer Machine AE - 350

High Technology PULVERIZER MACHINE

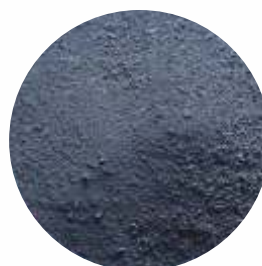

Best For Plastic Powder

Now a days demand for powder of plastics increasing and pulverizer is the better solution for that. Apeshwar Engineering offers better technology in size reduction of plastics via pulverizer machine.

Sailent Features

- Twin excel drive technology.
- Heavy duty structure design.
- Easy to operate and install.
- Low energy consumption and high output.
- The main housing, mill body have a water cooling system
- The high quality blades are easy to replace and can be used for several time after refeeding.
- Coarse metering from the screen are re-entering into the mill via closed-loop system.
- Desired powder quality can be achived with proper metering and various screening system.
- This pulverizing machine is dsigned with the adjustment bolts, which can allow you to adjust the gap between the stationary blades and rotating blades, finally to control the PVC or plastic powder fineness and size, and meet diffrent needs.

PVC Granules Powder

Specification	Models			
	AE - 250	AE - 350	AE - 550	AE - 750
Drive HP	55	74	105	125
Throughput in kg/hr	250kg/hr	350kg/hr	550kg/hr	750kg/hr
Mesh Powder	20 Mesh Powder			

Application

- Plastic pulverizer is specialized in producing powder from granules of scraps of, rigid, semi rigid, brittle and impact resistance material.
- Generally used in PVC Pipe Industries, Master Batch, PVC Recycle Plant, etc
- Typical applications are the pulverizing at PVC, UPVC, and various other plastics.

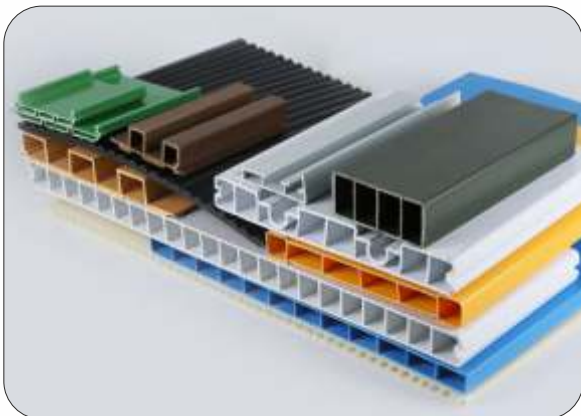

Industrial Area We Serve

PVC Pipe

PVC Fitting

PVC Profile

WPC & PVC Ply

PVC Plastic Pulverizer Machine
Plastic Extrusion Machine Die, Pin, Sizer, etc.
Scrap Grinder Machine
All types of Plastic Machinery
